Sir:

Applicant respectfully submits the following summary regarding the telephonic interviews conducted between Examiner Simon Nguyen and the undersigned on July 19, 2005.

INTERVIEW SUMMARY

On July 19, 2005, Examiner Nguyen held telephone discussions with the undersigned to clarify an amendment to the specification as to the fourth full paragraph of page 21 set forth in the Supplemental Preliminary Amendment dated May 12, 2003. It was agreed that the specification language to be replaced by the new paragraph should have been "page 22, lines 1-7" instead of "the fourth full paragraph of page 21". Accordingly, the undersigned authorized the Examiner to make such a change by Examiner's Amendment which is reflected in the Examiner's Amendment and Interview Summary provided with the Supplemental Notice of

Serial No. 09/904,628

Docket No. 1232-4739

Allowability mailed August 17, 2005. The undersigned, however, notes that the new paragraph in the Examiner's Amendment contains a few obvious typographical errors, as follows:

When the subscriber registration of the wireless terminal apparatus 103 can succeed, the wireless base station 111 releases the subscriber registration mode (step S509). In other works, the wireless base station 111 releases setting of the restriction notification signal area 306 of the RAM 304, and then set such a fact that the present mode is the normal mode into a normal notification signal area.

Specifically, the term "works" should be --words--, and the term "set" should be --sets--. This is consistent with the language in the specification at page 22, lines 1-7 and the Supplemental Preliminary Amendment of May 12, 2003 at issue.

This Statement is timely filed to reply to the Interview Summary mailed on August 17, 2005 along with the Supplemental Notice of Allowability. No fee is due by filing of this paper. However, the Commissioner is hereby authorized to charge any fees which may be required for this filing to Deposit Account No. 13-4503, Order No. 1232-4739.

Respectfully submitted,
